## SECTION 5: Fire-fighting measures

### 5.1. Extinguishing media

**Suitable Extinguishing Media** Water spray, dry powder, CO<sub>2</sub>.

**Unsuitable Extinguishing Media** Water jet.

### 5.2. Special hazards arising from the substance or mixture

**Hazards during fire-fighting** Harmful vapours.  
Evolution of fumes/fog.

High temperatures may cause spontaneous polymerizing reaction generating heat/pressure. Closed containers may rupture or explode during a runaway polymerization. Use a water spray or fog to reduce temperature of containers.

### 5.3. Advice for fire-fighters

**Protective equipment** Wear a self-contained breathing apparatus and full protective clothing.

---

## SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Use protective gloves, goggles and suitable protective clothing. In case of inadequate ventilation, use respiratory protection. Maximize ventilation after accidental release.

### 6.2. Environmental precautions

Contain contaminated water / firefighting water. Do not discharge into drains/surface waters/groundwater. Avoid release to the environment.

### 6.3. Methods and material for containment and cleaning up

Remove sources of ignition. Absorb with sand or other inert absorbent. Spillage may be stored as chemical waste in approved area.

### 6.4. Reference to other sections

See section 8, 13.

## SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

Keep away from heat, sparks and open flame. Use mechanical ventilation in case of handling which causes formation of vapours. Handle and open container with care. Wear full protective clothing for prolonged exposure and/or high concentrations. Take precautionary measures against static discharges.

### 7.2. Conditions for safe storage, including any incompatibilities

Protect from light, including direct sunrays. Container may be filled for only 90%. Keep containers tightly closed, separate from oxidizing agents. Store in original container in a dry, cool and well-ventilated place. Store at temperatures between 5°C and 30°C. Do not expose to temperatures above 60°C for more than 24 hours. High temperatures may cause spontaneous polymerization.

## 8.2. Exposure controls

### Appropriate engineering controls

Do not eat, drink or smoke at the work place. Provide adequate ventilation, including appropriate local extraction, to ensure that the defined occupational exposure limit is not exceeded.

### Individual protection measures, such as personal protective equipment (PPE)

**Eye/face protection** Wear eye/face protection. Wear approved chemical safety goggles where eyes exposure must be provided.

**Skin protection** Wear suitable gloves. Butyl and nitrile rubber gloves offer short-term protection. Later surgical gloves offer little protection. Gloves should be stored correctly and changed regularly, especially if excessive exposure has occurred.

**Respiratory protection** No need if adequate ventilation is provided. If engineering controls are insufficient or not present, wear suitable respiratory protective equipment.

**Other** Keep working clothes separately. Take off contaminated clothing immediately. Wash soiled clothing before reuse. Keep away from food, drinks and animal feed. Wash hands thoroughly after handling.

### Environmental exposure controls

Ensure effective control measures when working within the boundaries as specified in section 6.2 of each GES.
